NIPUN SHAHARAVAT

Full Stack Web Developer

Professional Summary

Dynamic Full Stack Developer Intern, adept at both front-end and back-end development, with a strong foundation in HTML, CSS, JavaScript, DOM manipulation, React, and back-end technologies. Committed to delivering precision and innovation across the entire stack, I excel in crafting immersive user interfaces and robust server-side solutions

Projects

Everhour Clone [Live Demo Link](#) [Github Repo Link](#)

- HTML
- CSS3
- JavaScript
- ReactJS
- Git

- Developed a user-friendly interface for efficient time management and task tracking.
- Implemented robust features for project progress monitoring and team collaboration.
- Utilized ReactJS and CSS3 to create a responsive web application.
- Contributed as both the project manager and developer, ensuring smooth execution and delivery.
- Successfully completed the project as an individual endeavor.

Mynetdiary clone [Live Demo Link](#) [Github Repo Link](#)

- HTML
- CSS
- JavaScript
- NodeJS
- ExpressJS

- The Mynetdiary clone is a web application developed using HTML, CSS, JavaScript, NodeJS, and ExpressJS.
- It has a clean and simple design with a focus on usability and functionality.
- The homepage displays a user login and signup form.
- Users can add food entries with details such as name, serving size, and nutritional information.
- The website tracks the user's daily caloric intake as well as their intake of various macronutrients and micronutrients.
